---

## Summary:

Results-driven web developer and automation specialist with 2 years of experience in Python and automation development. Proven expertise in crafting Python-based web applications, leveraging the Django framework for robust and scalable solutions. Well-versed in UiPath Automation for streamlining processes and enhancing operational efficiency. Eager to contribute my skills and experience to a dynamic team, driving innovation through Python and automation technologies.

## Skills & Competencies:

- Python
- HTML & CSS
- SQL
- JavaScript
- Django
- Flask
- RPA UiPath
- Power Automate
- Azure Fundamentals
- Postman
- PowerShell

## Work Experience:

### Brillio Technologies, Bangalore (Feb 2022 - Present)

#### Project – Web Application Development

**Role:** Python Developer

- Web Dashboard Development: Involved in the creation of a Python Django and Flask-powered web dashboard in Model View Control (MVC) architecture for efficient keyword search and result display. Improved client time management through a user-friendly interface, enhancing overall usability.
- User Interface Enhancement: Designed a robust user interface with HTML, CSS, and JavaScript, prioritizing responsiveness and visual appeal.
- Solution Design Documentation: Produced a comprehensive Solution Design Document using Visio, ensuring a clear roadmap for development and troubleshooting.
- Collaboration with Business Teams: Worked closely with business teams, gathering and understanding requirements to deliver a high-quality solution.
- MSSQL-Integrated API Development: Designed and implemented a robust Flask API featuring a specialized JSON input format for precision-driven retrieval of targeted information from an MSSQL database.
- Involved in the analysis, design, and development and testing phases of software development life cycle (SDLC).

#### Project – Automation

**Role:** Automation Developer

- Design, develop, and implement software robots that can automate repetitive and rule-based tasks with RPA UiPath tool.
- Maintain the automation projects by updating the bots as per the changes in the process.
- Monitor the bot performance and report any issues or improvements.

- Scheduling tasks on windows task scheduler to run the PowerShell scripts to generate reports for frequent interval of times and also send email alerts.
- Identified and resolved a critical bug in existing automation, leading to a significant 15% increase in bot accuracy. Implemented strategic solutions to enhance overall system performance.
- Developed comprehensive support documents, serving as valuable resources for both business and technical support teams, facilitating a clear understanding of the underlying processes.

#### Other Responsibilities:

- Integral member of the HIA (Hyper Intelligent Automation) COE team consistently engaged in the design and development of multiple Proof of Concepts (POCs) for innovative products

#### Education:

B.Sc. (Computer Science)

Institution: MIT ACSC Alandi, Pune.

Year of Passing: 2021 | Percentage: 70.96%

#### Certifications:

- AI-900 (Microsoft Certified-Azure AI Fundamentals)
- AZ-900 (Microsoft Certified-Azure Fundamentals)
- PL-900 (Microsoft Certified-Power Platform Fundamentals)
